shape your own office

Support system SOLO

Modern design and diversity

Support post:

The elegant aluminium support post can be provided in 3 standard heights according to your application. 230, 400 or 800 mm. Every post has at least 1 silicon ring for the height adjustment of the monitor.

Fixing methods:

Depending on your personal set up requirements you can choose between 3 different fixing methods.

Each one of them offers you a maximum of comfort and security for your individual needs.

The cable outlet (1) with a drilling diameter of 80 mm does not only stand out with its superior look but also solves your cable problems (min. desktop thickness 18 mm).

Our round fitting (2) shows simplicity in design and requires only a 12 mm drilling hole through the desktop.

Our side clamp (3) is very user friendly and can be easily mounted from any table side without any drilling or screws (max. desktop thickness 40 mm).

Stylish and useful

Height adjustment:

To avoid unnecessary back problems while working in the office it is important that your monitor is in the right position to your eyes. That is why the height adjustment of the monitor according to your very own personal needs is very important.

The silicon ring on the support post makes the height adjustment very easy. Simply lift up the monitor with one hand, then push the silicon ring to your desired position with the other hand and put the monitor back on the ring.

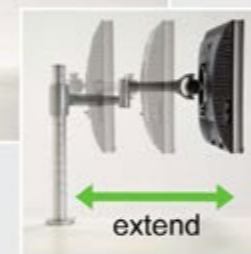

Healthy work environment

Monitor support SOLO:

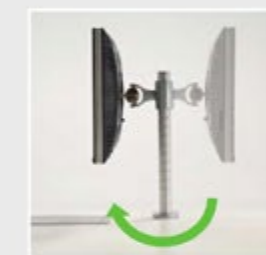

Long arm

Max load capacity: 25 kg
Max extendibility: 400 mm

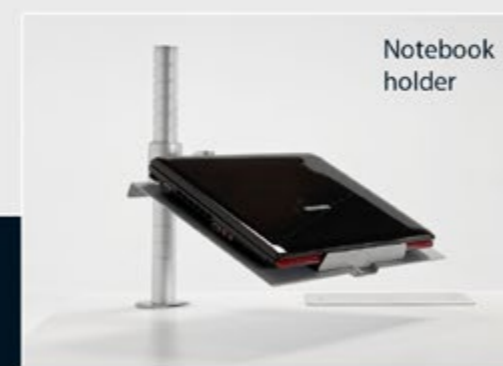

Short arm

Free rotation and adjustment
VESA Standard mount 75/100 mm

More diversity:

Use your laptop correctly.
Avoid back problems.

Enjoy even more diversity with our notebook holder and keyboard holder. Both of them are fully adjustable and provide the same comfort as our other support systems.

Use the space under your screen.

Support system QUATRO

Intelligent solutions

Support post:

The QUATRO aluminium support post can also be provided in 3 standard heights according to your application. 230, 400 or 800 mm. Every post comes with a black silicon ring, one cable clamp to hold the monitor cables and a silver plastic cover to give the aluminium post an elegant finish on the top.

Fixing methods:

According to your individual set up requirements you have the choice to use one of the 3 standard fixing systems.

1. Cable outlet fixing
2. Fixing with the round fitting
3. Side clamp fixing

Height adjustment:

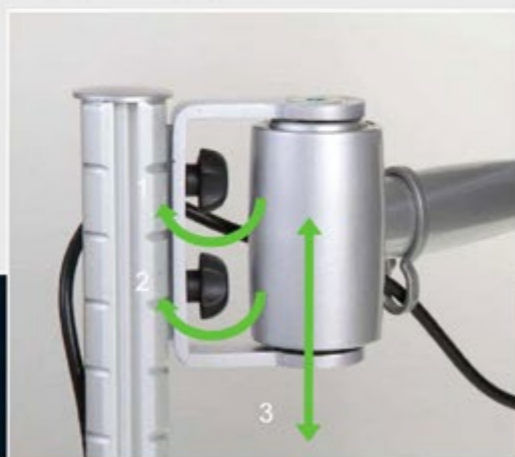

For simple set ups with one monitor arm on the QUATRO post only, you can benefit from the same advantages that the silicon ring has to offer. Simply push the silicon ring to the desired height position and slide the monitor arm down on the ring.

For more complex monitor arm set ups with 2 or more arms on one QUATRO post you can use the four slots on the post. Each slot gives you the possibility to fix monitor arms.

So in one height of the QUATRO post you can put 4 monitor arms. This set up is especially useful for users that require more than one monitor to work. Email communication, internet and projects can be worked on at the same time without having to change the windows on one screen all the time.

To adjust the height of the monitor arm in the QUATRO post slot you just need to loosen the two black plastic wing nuts on the monitor arm (1&2) and then slide the arm to the required height position (3). This height adjustment offers barrier-free positioning. Various monitor arms can be adjusted to different heights on one QUATRO post to fulfill all your personal needs.

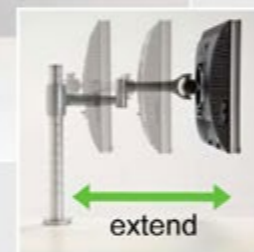

Maximising space availability

Monitor support QUATRO:

Long arm

load

extend

Max load capacity: 25 kg

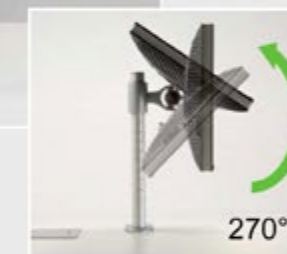

Max extendibility: 400 mm

Short arm

> 180°

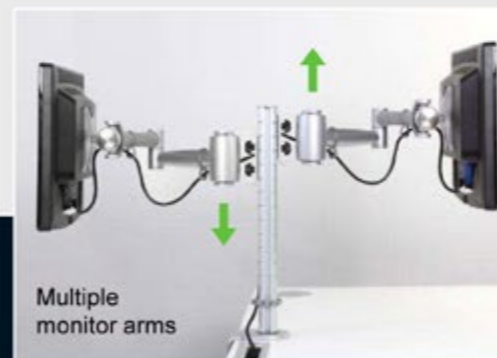

270°

Free rotation and adjustment

VESA Standard mount 75/100 mm

More diversity:

Multiple monitor arms

Email, internet and individual projects all in one sight.

The intelligent slot fixing system offers you various set up situations. Multiple monitor arms on one post or monitor arms that can use the full width of your desk partition are only two examples of what you can achieve with the QUATRO system.

Partition arm

Maximise your available space.

Functional design

Reinvent your desk:

The highly functional aluminium partition wall profile creates the extra amount of space that you need. It is flexible in length and can easily be adjusted in height on the support posts.

By using one or more partition wall profiles you can have more levels on your desk to temporarily store important documents, daily used stationary or any other personal material that you have on your desk.

By simply hanging the partition wall accessories into the aluminium section profile you can reinvent your desk. Our wide variety offers you just the right choice.

Convincing advantages once applied

 A4 document tray • portrait	 A4 document tray • landscape	 Pen holder single	 Pen holder triple on request only
 Telephone holder on request only	 Note holder	 Photo holder on request only	 CD rack on request only

Creating privacy

Partition walls:

The trend of modern office design often goes to open offices that support team work environment and easy communication. Yet not every job field allows this kind of office concept.

For workstation shapes that require more privacy or must be more space saving we have the appropriate accessory to follow that request.

The aluminium section profile can also be used to hold a partition wall of up to 8 mm thickness.

With its advanced design it can be used from both sides of the table to store your individual desk items.

Of course you can also use only our partition wall brackets and create a nice partition wall without the aluminium section.

A more intelligent way of saving space

Reliable functionality

design idea

CPU holders:

Being the centre piece of every PC the CPU requires the right protection in any application.

The fully adjustable DESKLIFE CPU supports are the ideal holding devices for every PC housing.

There are two assembly possibilities:

1. Fixing under the desktop.
2. Fixing to one side (up on an even area).

Safety in the office:

In order to comply with contemporary office safety requirements we have designed an extra feature that allows you to lock your CPU unit and protect all your important data with a few simple lock accessories.

These lock accessories are also fully adjustable to exactly match your individual CPU size.

Comfort and safety

World leading variety

Cable outlets:

Cables of keyboards, computer mouse, monitors or other devices on the desk can be really space taking and need to be managed to avoid cable tangle.

Being one of the global leaders in the variety of modern office desk cable outlets we can offer you just the perfect choice for your personal needs.

All our cable outlets are designed according to common industrial standards. Both plastic and metal cable outlets come with a diameter of 60 or 80 mm.

Brush feature:

To entirely hide the cables when passing through the desktop we have designed differently shaped brushes in the cable outlets.

Metal cable outlets

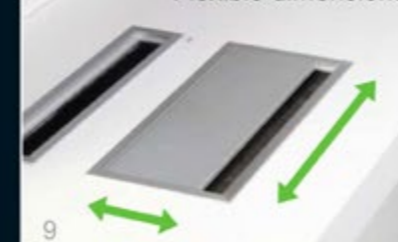

60 and 80 mm (with brush)

80 mm (with brush)

Flexible dimensions

Plastic cable outlets

80 mm (with or without brush)

60 and 80 mm (with or without brush)

60 and 80 mm

Metal cable outlets

60 and 80 mm (with brush)

60 and 80 mm (with brush)

60 and 80 mm (with brush)

Cable channels:

Cable management doesn't stop under your desk. An excellent addition to the design of modern desks are our elegant cable channels, which can be mounted horizontally or vertically.

Aluminium outlets:

The square or rectangular shaped aluminium cable outlets satisfy contemporary design requirements. Being provided in various widths and lengths, with an antidust brush, with or without cover flap the cable outlets in this product range can be the solution for any cable management task.

Cable Management

Powerful solutions

Electrification unit:

80 mm (LAN, USB, 230V)

The fast evolving options of electronic accessories demand the right responses. Our multifunctional electrification unit provides all the necessary connections like USB, LAN, HDMI, Audio and one 230V power plug.

USB Hub cable outlets:

Use the USB Hub cable outlet to connect up to 4 devices directly to your computer or laptop. Your printer and external hard drive, your smartphone or just your memory stick, all in one place.

Simply dock on to the USB world.

60 mm (with 4 USB 2.0) or 80 mm (with 4 USB 2.0)

Cable management

Powerful solutions

Cable outlet with induction function:

Our high quality cable outlet made of metal with inductive charging function is characterized by its fine haptics and first class surface.

Whether minimalist or classically elegant, with its clear, timeless design, which is awarded the Red Dot Design Award and a large variety of available surfaces it fits perfectly into every piece of furniture.

- Wireless charging
- Induction & cable outlet
- Elegant and timeless design
- High quality through the use of metal
- Fine haptics and first class surfaces

Further details:

Accessories

Every "Phoenix" monitor mounting plate (VESA standard) has an elegant ABS plastic back cover to hide the 4 screws and finish off your monitor just right from the back.

Additionally every "Phoenix" monitor arm set is including the necessary tools (e.g. allen keys) that are required for a set up.

The "Phoenix" long arms, medium length arms, short arms and the "Phoenix" partition wall arms are equipped with 3 different ABS plastic cable clips to hold the cables of the monitor.

The support post cable clip has the advantage of taking at least 4 cables with different diameters.

Laptop holder

Suitable for the support posts "Solo" & "Quatro"
Load capacity: up to 8 kg
Laptop sizes: max. W 400 x D 300

Article No.	Application	Color	
82324.0067	support post	silver	1 set incl. arm (1)
82376.0067	partition wall	silver	1 set incl. arm (2)

Application 1: Monitor support post

Put the laptop holder on the Desklife support post "Solo" or "Quatro".

Enjoy the comfort of being able to adjust your laptop screen to the right ergonomic position to your eyes. All you need is an extra keyboard.

Application 2: Partition wall profile

It is also possible to put the laptop holder on your partition wall.

Simply hang the laptop holder bracket at the desired position into the partition wall profile (left or right) and adjust the height of your screen by either putting the partition wall up or down on the support posts or by flapping the metal tray up or down.

Further applications

Lock your laptop with our Desklife notebook locks and feel safe during your lunch break.

Monitor Support Keyboard Series

Keyboard holder

Suitable for the support posts "SOLO" and "QUATRO"

Load capacity: up to 8 kg

Article No.	Material	Color	
82325.0067	steel	silver	1 set

Application 1: Monitor support post

Put the keyboard holder under your monitor on the Desklife support post "SOLO" or "QUATRO". Place your keyboard on the tray whenever you do not need it and enjoy the comfort of using that extra space on your desk for taking some notes or reading an interesting survey.

Application 2: Partition wall support post

It is also possible to put the keyboard holder on one of your partition wall support posts.

With its full rotatability the keyboard tray can even be used from both sides of the desk by you or your colleague working opposite your work station.

Further applications

Of course the keyboard holder can be used for any other stationary item.

Use it for anything you like.

Cable Management
Cable Outlets

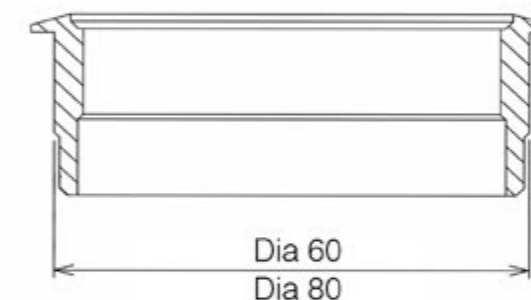

Technical Specifications

All **Desklife** metal and plastic cable outlets have an outer ring diameter of either 60mm or 80mm.

Each cable outlet ring has 12 ribs on the outside of the ring (see below detailed drawing). The outer dimension measured over the ribs is a little bit larger than the hole in the desktop. These ribs are used to ensure a tight fit and do not allow the ring to be turned in your desktop.

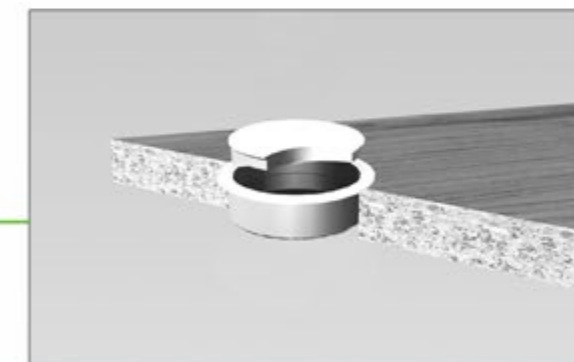

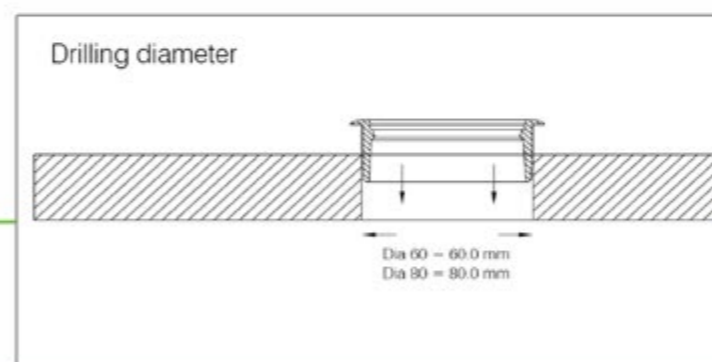

12 ribs

Desktop Drilling Instructions

For the dia 80mm cable outlets please drill a hole of 80.00 mm in the desktop.
For the dia 60mm cable outlets please drill a hole of 60.00 mm in the desktop.

DUPLEX cable exit

Smooth design, smart access

Easy double-sided access to power and data makes the Duplex cable exit a perfect accessory to a modern office furnishing. The cable exit offers in conjunction with a cable box room for up to 8 power, data and multimedia modules. Screw holes on the front sides guarantee an easy installation.

Double-sided access

Cable Management Aluminium Cable Outlets

Technical Specifications

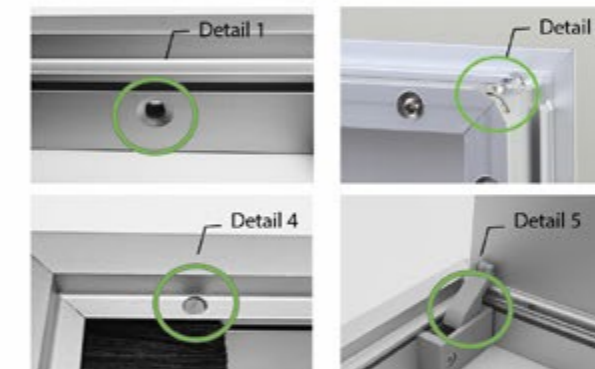

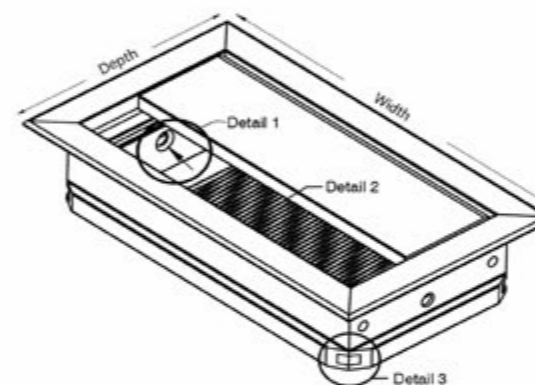

All desklife aluminium cable outlets are made from high grade aluminium alloy to meet the high industrial standards.

A standard radius 8 in the table section cut out can be used for routing thanks to the cable outlet's specially processed corners. (see detail 3)

With a 4 x 15 self tapping chipboard screw the frame of the cable outlet can be fixed to the desktop. (see detail 1)

The integrated magnet in the frame can hold the cover of the cable outlet even in an up side down position. (see detail 4)

A specifically designed spring mechanism mounted on the left hand side allows to reduce the noise considerably when closing the lid. (see detail 5)

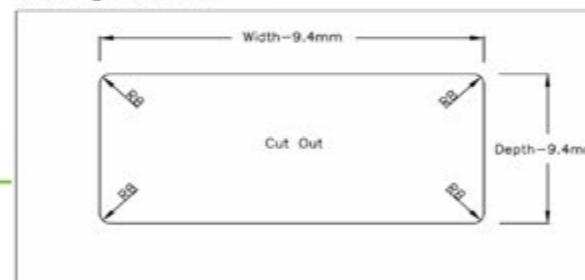

Detail 1: Screwhole for 4x15 mm hole
Detail 4: Magnet to hold cover

Detail 2: Brush to hide cables
Detail 3: Radius 8 for easy cut out
Detail 5: Spring mechanism (for width 100 mm upwards on demand)

Desktop Routing Instructions
