Boating-, Caravan- and Motor-Home Equipment

Handle solutions | Functional Handles | Locking Systems

Überzeugend. Auf der ganzen Linie.

Convincing. In every aspect.

Convaincant. Sur toute la ligne.

Als kreativer, zuverlässiger Partner der Möbelindustrie bietet confurn viel mehr als Griffe, Knöpfe und Beschläge. confurn steht für innovative, maßgeschneiderte Lösungen von der Produktentwicklung über die wirtschaftliche Serienproduktion und optimale Qualitätssicherung bis hin zur termingerechten Lieferung. Sagen Sie uns, womit wir Sie überzeugen können. Wir freuen uns auf Ihre Herausforderung!

Being a creative and reliable partner to the furniture industry, confurn offers much more than just handles, knobs and fittings. confurn stands for innovative, customized solutions including all the processes from product development over commercial mass production and thorough quality assurance up to on-schedule deliveries. Simply let us know how we can convince you. We look forward to your challenge!

En tant que partenaire créatif et fiable de l'industrie du meuble, confurn offre bien plus que des poignées, des boutons et des ferrures. confurn est également synonyme de solutions innovantes et personnalisées allant du développement de produits en passant par la production à l'échelle commerciale combinée à une assurance qualité optimale jusqu'à une livraison fiable et ponctuelle. Dites-nous tout simplement comment nous pouvons vous convaincre. Nous relèverons le défi !

Erfolg aus Erfahrung und Ideen.

Success through experience and ideas.
Succès grâce à l'expérience et aux idées.

Seit mehr als 30 Jahren liefert confurn Beschläge und Komponenten für verschiedenste Anwendungsbereiche – ganz nach Bedarf sowohl in kleinsten Stückzahlen als auch in Großserien. Durch umfassende Marktkenntnis, immer neue Ideen und Know-how auf dem aktuellsten Stand, erfüllen unsere Mitarbeiter auch ganz spezielle Ansprüche absolut präzise.

confurn has been supplying fittings and components to several application fields for over 30 years – and this from customized unique pieces to serial production. Thanks to our rich and extensive experience within the furniture market, our continuous development of new ideas and the most up-to-date know-how, our staff is used to meet even special requirements with absolute precision.

Depuis plus de 30 ans confurn fournit des ferrures et des composants destinés à divers champs d'application en couvrant tous les besoins, de la fabrication à petites quantités jusqu'à la grande série. Grâce à de longues années d'expérience sur le marché de l'ameublement, de nouvelles idées continuellement développées et une expertise constamment renouvelée et actualisée, notre personnel est hautement qualifié pour répondre aux exigences particulières. Et cela de manière absolument précise.

Service und Logistik mit System.

Service and logistics with a system.
Service et solutions logistiques ayant du système.

Kundenorientiertes Denken geht für uns weit über das fertige Produkt hinaus. Ein leistungsfähiges Logistik- und Lagerhaltungssystem mit ausgewählten Zulieferern und Speditionspartnern, garantiert jederzeit und weltweit eine termingerechte und sichere Belieferung.

For us, customer-oriented thinking is much more than just the finished product. Our efficient logistics and inventory management system includes well chosen suppliers and forwarding partners. This guarantees fast and timely deliveries anywhere in the world.

Pour nous, la pensée orientée vers le client représente beaucoup plus que le produit fini. Nos systèmes logistiques et de stockage efficaces ainsi que la coopération avec des sous-traitants et des transporteurs bien choisis, garantissent une livraison rapide et fiable à tout moment et à chaque endroit dans le monde.

Qualität und Design nach Maß.

Custom-made quality and design.
Qualité et design sur mesure.

Die enge partnerschaftliche Zusammenarbeit mit unseren Kunden ermöglicht es uns, Wünsche und Markterfordernisse direkt in die Entwicklungs- und Fertigungsprozesse einfließen zu lassen. Antizipation von möglichen Schwachstellen, prozessbegleitende Überwachung von Vorgaben und strenge Endkontrollen gewährleisten bei allen Komponenten und Lösungen ein beispielhaft hohes Qualitäts- und Designniveau.

Due to the close cooperation with our customers we are able to directly integrate special requests and market requirements into the development and manufacturing processes. The anticipation of possible weak points, monitoring of process specifications as well as stringent final inspections allow us to achieve an exemplary high level of quality and design for all our components and solutions.

Grâce à la coopération étroite avec nos clients nous sommes en mesure d'intégrer chaque demande spéciale ou exigence particulière du marché directement dans nos processus de développement et de fabrication. L'anticipation de points faibles potentiels, le suivi continu des spécifications de processus et des contrôles fins rigoureux nous permettent d'obtenir un niveau très élevé en matière de qualité et de design pour l'ensemble de nos composants et solutions.

Door entry handles

Please come in.

When entering a new boat, the first handle you are going to touch will be the door handhold. A kind of business card that should give a positive first impression with regard to quality and design.

In collaboration with its customers, confurn develops the perfect solutions for designing this important accessory part, no matter whether a specific size, a special design matching the interior fittings, a discrete or wide-area lighting or different surfaces are required.

So put the design of your « business card » into professional hands to develop the perfect match to your product.

Functional Handles

Closed system.

Confurn offers a variety of functional handles and functional knobs, matching locking systems as well as functional solutions for latches and coat hooks.

Thanks to the close collaboration with our customers we are able to perfectly harmonize design with innovative technology and sophisticated functionality.

Our studies consider the whole system, not just a single component. This makes it possible for us to create complex solutions for functional handles with matching locking systems that will optimally equip your caravan or boat.

Hook Locking System

Good functionality.

Similar to the handles with locking function, the hook locking systems ensure the technical locking of your furniture element.

However, being visually much smaller and slender, their main focus lies on pure functionality. Connected by a strike, it is the optimal and space-saving solution for a safe and discreet locking of your furniture element.

Another possibility is the use of a hook locking system in combination with a family of handles by your choice. If a compatible handle is used, the locking system can be positioned behind the grip slot. Thus, the visual appearance of a family of handles will not be interrupted by a functional handle and the design of the furniture remains uniform.

Functional Knobs

Well closed.

Similar to the handles with locking function, the knobs with locking function ensure the technical locking of your furniture element.

However, being visually much smaller and slender, their main focus lies on pure functionality as well as design. An optimal and space-saving solution for a safe and discreet locking of your furniture element.

Another possibility is the use of a knob with locking function in combination with a family of handles by your choice. If a compatible handle is used, the locking system can be positioned behind the grip slot. Thus, the visual appearance of a family of handles will not be interrupted by a functional handle and the design of the furniture remains uniform.

Locking system Push In "Evolution"

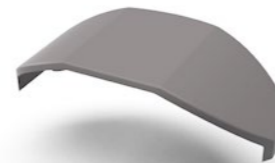

Newly developed function lock with a very shallow height

Work in the background.

Well hidden but indispensable: The locking systems do the actual work in all technically lockable furniture elements. A high quality mechanism provides the standard to ensure the longevity of the complete system.

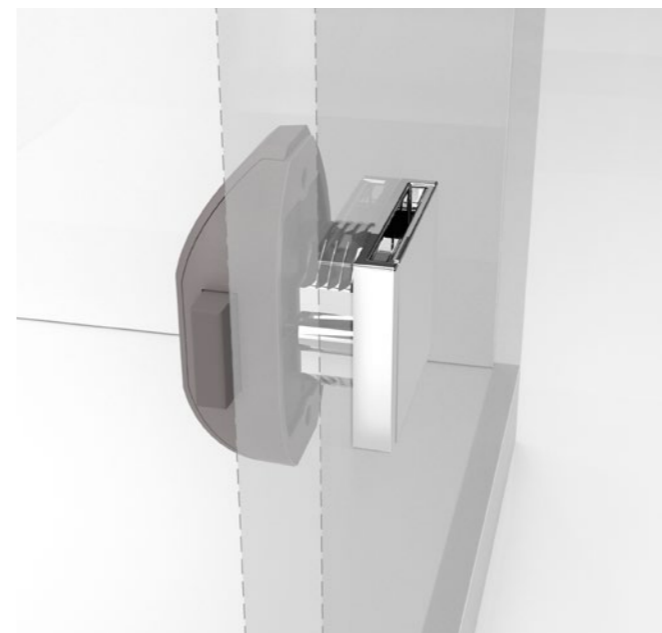

It is in this respect that the focus of our developments lies in the lightness of materials as well as space-saving solutions in the interior of the furniture element.

Handle Bars

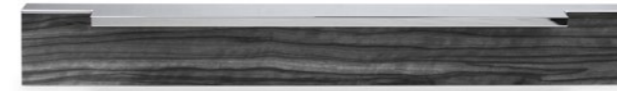

With & and without locking function

Meeting all situations.

Handle strips are ideal for underlining the design of your furniture element. Regardless whether it is a drawer, a door or a flap door, there will be no disturbing elements on the front surface. The handle strips easily adapt to each kind of furniture.

We offer a variety of designs, in different surfaces, variable lengths, with or without locking function.

Cable Outlets & Electrification

Tidy and powerful.

Cable tangle? Nobody wants it! A flat battery? Nobody wants it either! Even on the move, we want to have the possibility to connect, recharge and use our electronic devices in an easy and convenient way.

We offer a variety of solutions for optimal cable management as well as easy-to-handle electrification systems. Of course, all designed according to your individual needs. Do not hesitate to contact us for more information on this subject.

Multifunctional Solutions

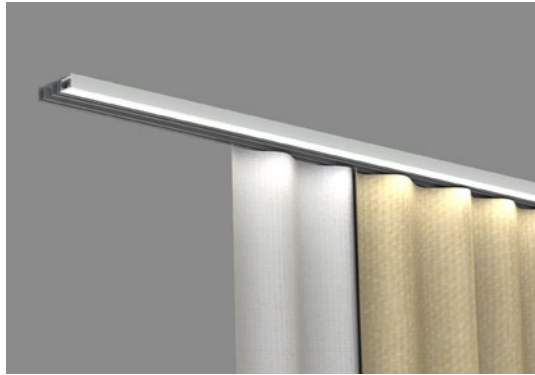

Open for every wish you have.

New ideas, wishes or even problems often occur during the development or working process. Then, it is a matter of finding the optimal solution to achieve a perfect result! It is often the small details that can transform "a good idea" into "a perfect solution". Especially in the area of boating and caravanning, these solutions are more popular than ever, because only the companies that stand out of the crowd are able to offer their customers solutions meeting exactly their requirements.

It is confurn that finds, develops and offers exactly these solutions in collaboration with your company. We are open for every wish you have!

Curtain rail system – illuminable

The integrable LED technology provides this innovative system with an effective long-life lighting and illuminates the room with indirect lighting. Due to the 2-rail system, the attachment of a lower and an upper curtain is easily possible. The plain-colored panels are available in 2 heights and can be finished with a decor according to customer wishes.

Length: 3,00 m (cut ware)
 Material: Plastic

82690.01.0000 Total length of swivel arm 240 mm

Dimensions::

Width : 455 mm / 230 mm
 Depth : 39 mm
 High : 251 mm
 Material : Aluminium/Zamac/PA
 Surface : Aluminium eanodized/black

Product features::

- Very flat and space-saving depth (39mm)
- Wall mount with « snap-on mechanism » to lock the screen
- Easy snap-in and unlocking system through release lever
- Release lever optionally mounted upwards or downwards
- Length of release lever can be adjusted on request
- Tension controlled swivel arm
- Optimal cable guidance through cable clips
- Modern, timeless design
