# POIGNÉES MÉTALLIQUES

| TrendBook 2022

# | TrendBook 2022

Pour continuer notre succès, la collection de cette année a également été créée en coopération avec des bureaux de design renommés et se caractérise par une élégance épurée et intemporelle. La conception exceptionnelle de la majorité de nos profils poignée, poignées et boutons de meuble a pour base des formes carrées ou circulaires. De plus, nous avons accordé une attention toute particulière à une finition de haute qualité et une maniabilité optimale de nos produits.
