FROM SYSTEM TO MODULE

CADRO can do more than just profiles and connectors.

CADRO Modules

CADRO Modules transforms the flexible frame system into a range of products that can be ordered directly. We machine profiles and system components, assemble the required parts, fit side panels and sub-assemblies, and put together complete module sets for further processing or direct use.

The difference

Not just individual components: on request, customers can receive pre-assembled, fitted and labelled module sets – right through to flat-pack packaging for efficient further processing

ONE SYSTEM – FIVE STAGES OF MANUFACTURE

From aluminium profiles to ready-to-sell sets.

01

CUTTING TO SIZE

Profiles are cut to size according to module dimensions.

02

MACHINING

Drilling, milling and system-specific preparation.

03

ASSEMBLY

Connectors, fasteners and accessories are selected and assembled as required.

04

FITTING

Side panels and specified sub-assemblies are pre-assembled.

05

PACKAGING

Packaged as sets, to order, and as flat-pack on request.

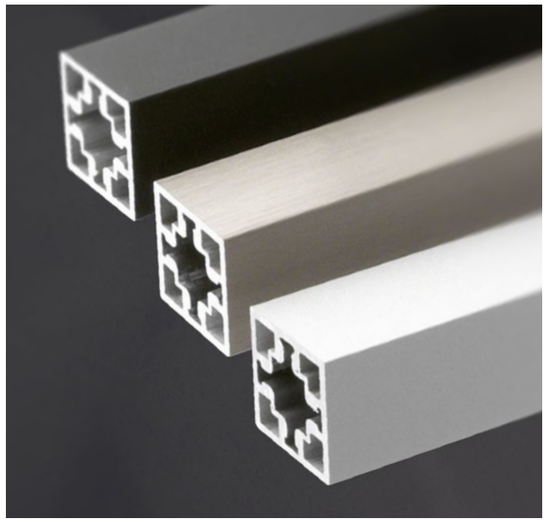

Modular design

Side panels are pre-assembled as a sturdy unit. The width is determined by the appropriate set of struts. This allows a small number of standardised side panels to be combined to create a range of widths – ideal for stock management, kit assembly and flat-pack logistics.

THE CADRO BASIS

Ideal for pre-assembled modules.

Important for catalogue items

The modules are designed as standardised sets. Shelves, back panels or doors can be added as optional extras or fitted by the customer, depending on the product.

System specifications

Profile cross-section
18 x 18 mm

Shelves
System designed for 16 mm chipboard

Glass shelves
6 mm possible above the glass shelf profile

Standard finishes

Matt black

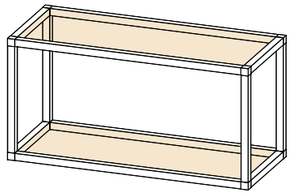

Matt brushed stainless steel

Matt silver

WALL MODULES | H 300 MM

Three widths. Depth 250 mm. Pre-assembled side panels + set of struts.

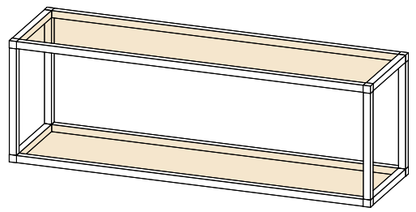

Wall module 600

CM-W600-300-250
W x H x D: 600 x 300 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

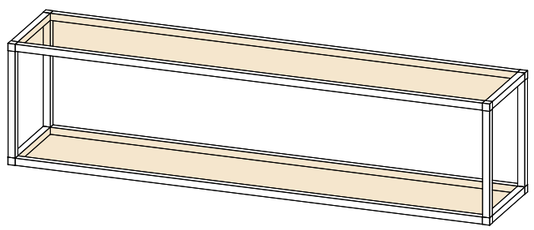

Wall module 900

CM-W900-300-250
W x H x D: 900 x 300 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

Wall module 1200

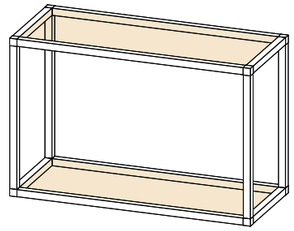

CM-W1200-300-250
W x H x D: 1200 x 300 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

WALL MODULES | H 390 MM

Three widths. Depth 250 mm. Pre-assembled side panels + set of struts.

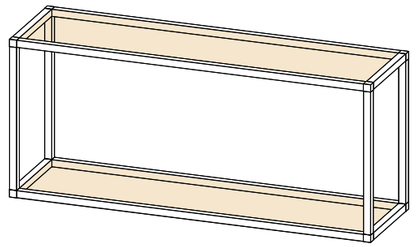

Wall module 600

CM-W600-390-250
W x H x D: 600 x 390 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

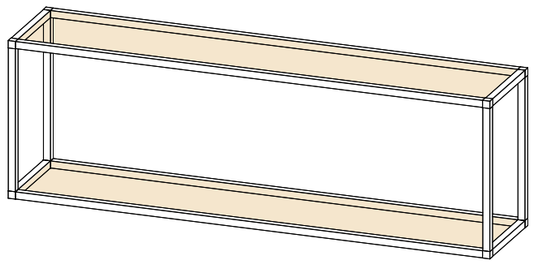

Wall module 900

CM-W900-390-250
W x H x D: 900 x 390 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

Wall module 1200

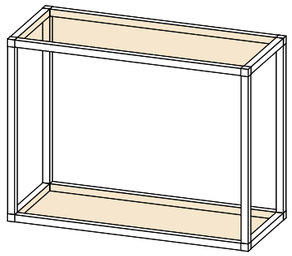

CM-W1200-390-250
W x H x D: 1200 x 390 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

WALL MODULES | H 450 MM

Three widths. Depth 250 mm. Pre-assembled side panels + set of struts.

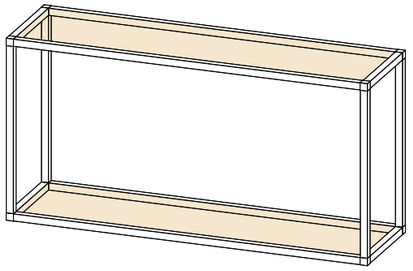

Wall module 600

CM-W600-450-250
W x H x D: 600 x 450 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

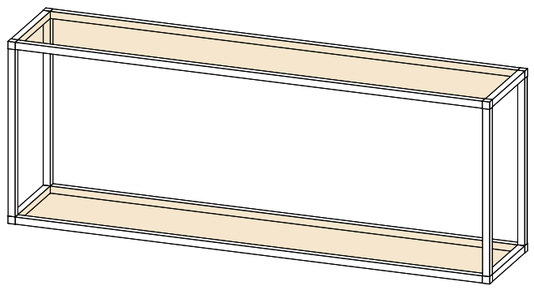

Wall module 900

CM-W900-450-250
W x H x D: 900 x 450 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

Optional shelves available

Wall module 1200

CM-W1200-450-250
W x H x D: 1200 x 450 x 250 mm

Pre-assembled CADRO shelving set with two pre-assembled side panels and a matching set of struts. Designed for 16 mm shelves. Supplied in flat-pack packaging as a complete set.

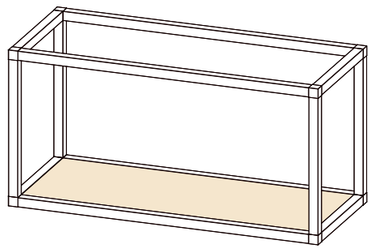

Optional shelves available

living solutions

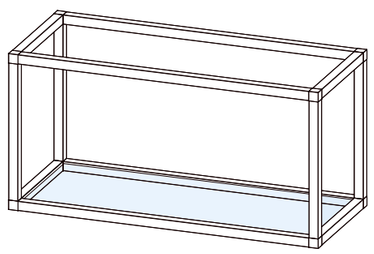

INSERTS | SURFACES | DOORS

The module remains standardised – the surface is tailored to the project.

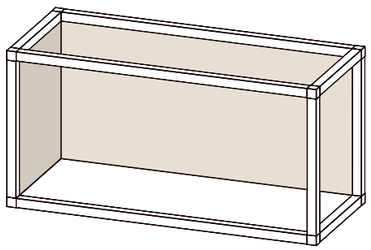

16 MM SHELF

Engineered wood / finish as specified by the customer.
CADRO profiles are designed for use with 16 mm chipboard.

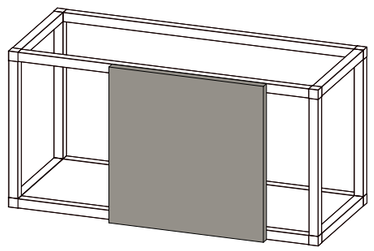

6 MM GLASS SHELF

With CADRO glass shelf profile for glass shelves.
For a light, transparent look.

SIDE SURFACE | REAR PANEL

16 mm panels can be integrated into the modular system or fixed in place with screws.

SLIDING DOOR

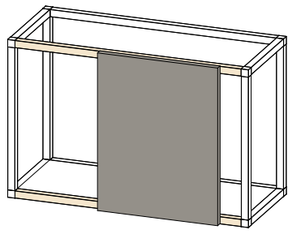

In front of or within the frame system. CADRO offers profiles for Hettich SlideLine M / SlideLine 66.

Configuration

Inserts and surfaces may be supplied as part of the set or simply prepared structurally.
The material, finish and edge treatment are defined for production projects.

SLIDING DOOR OPTION

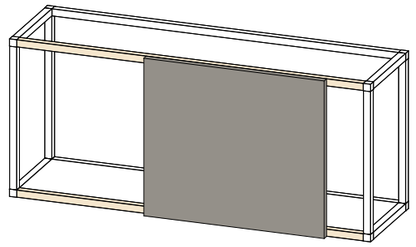

For wall modules in widths of 600, 900 and 1200 mm.

Sliding door kit 600

CM-SD600
For wall modules 600 mm wide

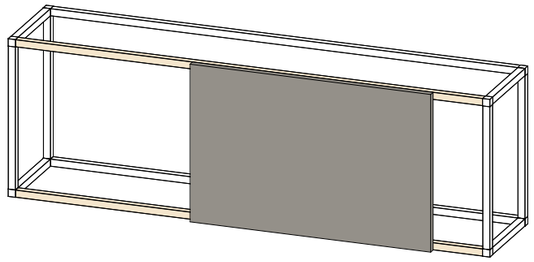

Pre-assembled strut set for a sliding door system. Can be combined with wall modules H 300 / 390 / 450 mm. Fittings and door panels are supplied to suit the specific project.

Sliding door kit 900

CM-SD900
For wall modules 900 mm wide

Pre-assembled strut set for a sliding door system. Can be combined with wall modules H 300 / 390 / 450 mm. Fittings and door panels are supplied to suit the specific project.

Sliding door kit 1200

CM-SD1200
For wall modules 1200 mm wide

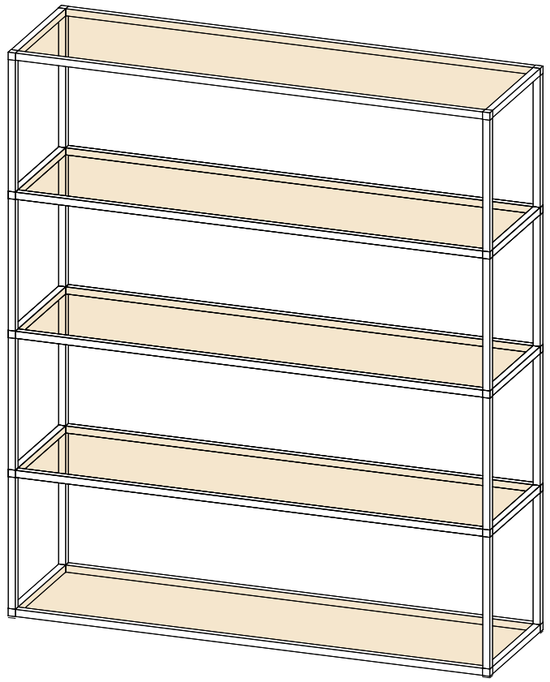

Pre-assembled strut set for a sliding door system. Can be combined with wall modules H 300 / 390 / 450 mm. Fittings and door panels are supplied to suit the specific project.

CADRO Technology

The existing CADRO system supports sliding doors mounted in front of or within the frame and is designed for use with, amongst others, Hettich SlideLine M and SlideLine 66.

FREE-STANDING SHELVING UNIT

Free-standing modular base for multiple shelving levels.

SHELVING

CM-ST1200-1493-350
W x H x D: 1200 x 1493 x 350 mm

Pre-assembled display unit with pre-fitted side frames and matching cross-braces. Designed to accommodate multiple shelving levels. Shelves can be added to suit customer requirements, either in 16 mm wood-based material or, alternatively, as a glass option.

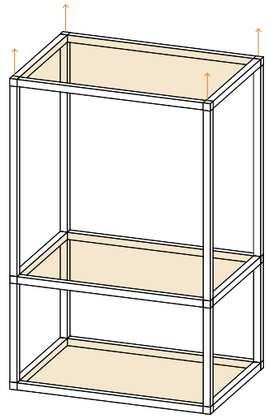

Optionally available with shelves – wood or glass

Delivery details

- → Side panels pre-assembled
- → Strut sets supplied per set
- → Connecting elements included
- → Inserts optional
- → Base/floor configuration specific to the project
- → Flat-pack packaging available

CEILING MODULES

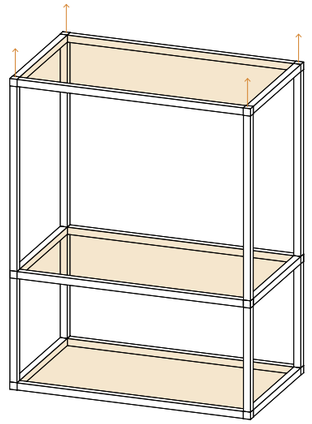

Height 768 mm | Depth 350 mm.

Ceiling module 500

CM-D500-768-350
W x H x D: 500 x 768 x 350 mm

Pre-assembled ceiling-mounted shelving unit with two side panels and a set of struts. Designed to accommodate 16 mm shelves. Select ceiling fixings suitable for the project.

Ceiling module 600

CM-D600-768-350
W x H x D: 600 x 768 x 350 mm

Pre-assembled ceiling-mounted shelving unit with two side panels and a set of struts. Designed to accommodate 16 mm shelves. Select ceiling fixings suitable for the project.

Note

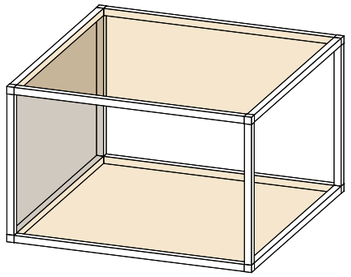

Load-bearing capacity and stability depend on the model, inserts and installation conditions, and must be technically specified prior to series production approval.

Planning

The ceiling structure, fixing points and load transfer must be assessed on a project-by-project basis.
The module can be prepared and labelled accordingly for specific series applications.

KITCHEN ISLAND MODULE

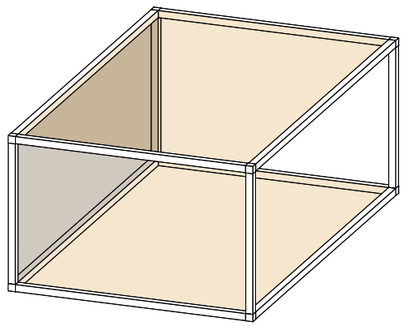

Width 610 mm | Height 368 mm | Frame depth as per kitchen design

Island module

CM-I610-384-609
W x H x D: 610 x 384 x 609 mm

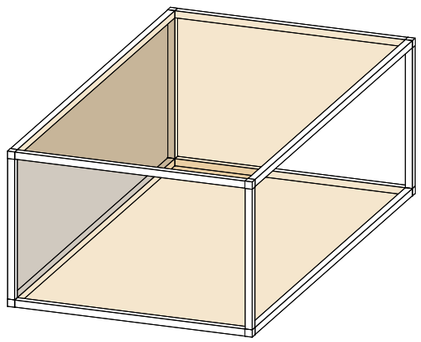

Shelving unit for freestanding and end-of-row configurations. Frame pre-assembled. 16 mm shelves and side panels can be fitted to customer specifications.

Island module

CM-I610-384-960
W x H x D: 610 x 384 x 960 mm

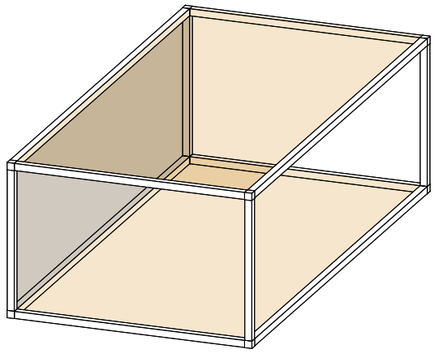

Shelving unit for freestanding and end-of-row configurations. Frame pre-assembled. 16 mm shelves and side panels can be fitted to customer specifications.

Island module

CM-I610-384-1074
W x H x D: 610 x 384 x 1074 mm

Shelving unit for freestanding and end-of-row configurations. Frame pre-assembled. 16 mm shelves and side panels can be fitted to customer specifications.

Island module

CM-I610-384-1174
W x H x D: 610 x 384 x 1174 mm

Shelving unit for freestanding and end-of-row configurations. Frame pre-assembled. 16 mm shelves and side panels can be fitted to customer specifications.

WHEN THE STANDARD ISN’T ENOUGH

CADRO modules can be viewed as an OEM modular system.

AVAILABLE OPTIONS

→ DIMENSIONS

Widths, heights and depths outside the standard range

→ SURFACES

Finishes, back panels, doors, inserts, glass shelfs and customer-supplied materials

→ FUNCTION

Wall-mounted, freestanding, island or ceiling-mounted solutions; sliding, folding, lighting

→ LOGISTICS

Customised sets, labels, assembly level and packaging unit

ASSEMBLED, SET-BASED, PACKAGED

Added value is also created behind the scenes.

01

PRE-ASSEMBLING SIDE PANELS

Consistent assembly quality and reduced error rate.

02

PICKING THE BRACE SET

All length- and module-specific parts in a single set.

03

CHECKING QUALITY

Checking for completeness, surface finish and specified machining.

05

MARKING

Item number, variant, customer or assembly allocation

05

PACKING IN FLAT-PACK FORMAT

Compact packaging for storage, transport and further processing.

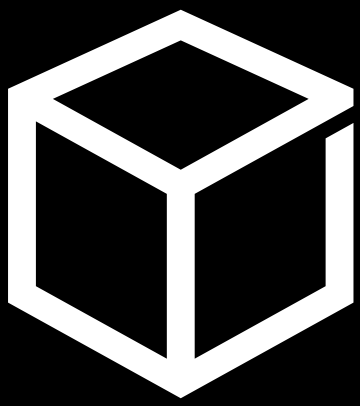

Flat-pack: Compact. Clearly organised. Suitable for mass production.
