

# MORE SPACE FOR IDEAS

The CADRO frame system is now even more versatile: With our three new profiles, shelf, side and rear panels can be connected three-dimensionally, with exceptional stability and precision – for constructions that impress in terms of both design and function.

This expands our range of CADRO base profiles for individual, design-oriented furniture concepts.

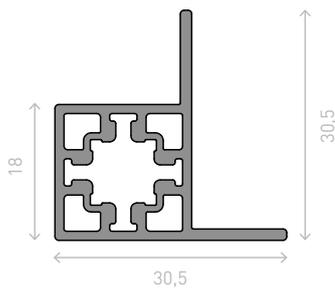

Discover the complete furniture frame system at [confurn.de/en/cadro](http://confurn.de/en/cadro)
